Full Stack Web Developer, with 2.5 years of experience, creating and maintaining websites, web applications, rest APIs and various integrations. Delivering solutions with a great user experience, with attention to data integrity and availability and with new features and integrations with other web systems and APIs, reaching thousands of users and scaling projects in multinational companies such as AMBEV, VALE, Santander Bank, etc. For this, I used Javascript, NodeJS, ReactJS, Python, C#/ASP.Net, HTML and CSS

## EXPERIENCE

**LG Lugar de Gente** (2021/06/16 - Present)  
Full Stack Web Developer

LG specializes in technology solutions for people management with more than 1,000 customers. Here, I work with development, testing and implementation of customized solutions for customers, having direct contact with them. Some of the clients are Pfizer Labs, Carrefour, Santander Bank, etc.  
I developed REST and SOAP APIs applications, frontend and/or backend of web applications and integrations with external services such as Gupy/Kenoby, using C# / ASP.NET Core / .NET Framework, HTML / CSS / Javascript, Oracle / SQL Server and recently, ReactJS.

**Inforsystem** (2020/06/12 - 2021/06/15)  
Full Stack Developer

Inforsystem is a technology company that provides a complete legacy and on the cloud business management system (ERP, Electronic Billing, Bank Transactions, commercial invoice, receipts, etc.), for small and medium-sized companies.  
Here, I performed the maintenance of all modules of the system, and also, developed new functionalities such as the integration of the system with 'MercadoLivre', a marketplace with more than 211 million users. This allowed the customers to register their products on this platform and link them with the system.  
I worked with C# / ASP.NET Core / .NET Framework, HTML / CSS / Javascript, Python, Firebird and Delphi

**Freelancer** (2020/01/30 - Present)  
Developer

As a freelancer I work primarily in web development, but I also do software development in general. For web development, I design and develop responsive websites such as **PBD** and **Magnify**, using HTML, CSS , pure Javascript and recently ReactJS.  
In software development, I performed product purchase and sale automations, Web Scraper, cryptocurrency purchase and sale automation, application to control project/activities hours, among others ([gitHub] (<https://github.com/brunomileto>)), using ReactJS, Electron, NodeJS and Python.

**JBS** (2016/12/04 - 2018/12/01)  
Mechanical Engineer

JBS is one of the global leaders in the food industry, with headquarters in more than 20 countries. Here I worked as a mechanical engineer, responsible for the projects of a unit. My main activities were the development of memorials for future works, team management and project management, with an annual budget of millions of reais. The most important project that I was responsible, was the biggest project of the year that last 6 months and cost approximately 20 million reais. I was one of the engineers responsible for leading the teams with almost 100 employees.
